U.S. Patent & TMO/TM Mail Rpt Dt. #77

The Examiner has required restriction between claim 5, drawn to a pallet shelving system having lateral support beams (classified in class 211, subclass 191), claims 1 and 2, drawn to a pallet shelving system (classified in class 211, subclass 189), claims 3 and 4, drawn to a pallet stop cable system (classified in class 211, subclass 209), and claim 6, drawn to a method for maintaining a flue space (classified in class 211, subclass 194). Restriction was required because the Examiner thought that the inventions are related as either combination and subcombination, product and process of use, or subcombinations.

In view of the above, it is respectfully requested that claims 3 and 4 be examined and that claims 1-2 and 5-6 be withdrawn from further consideration.

Dated: September 9, 2005

Respectfully submitted,

Robert Charles Hill
Attorney for Applicant
